Smap3D GmbH, Am Marktplatz 7, 93152 Nittendorf, Germany
Phone: +49 9404 9639-41,
E-Mail: info@smap3d.com

1. Change password

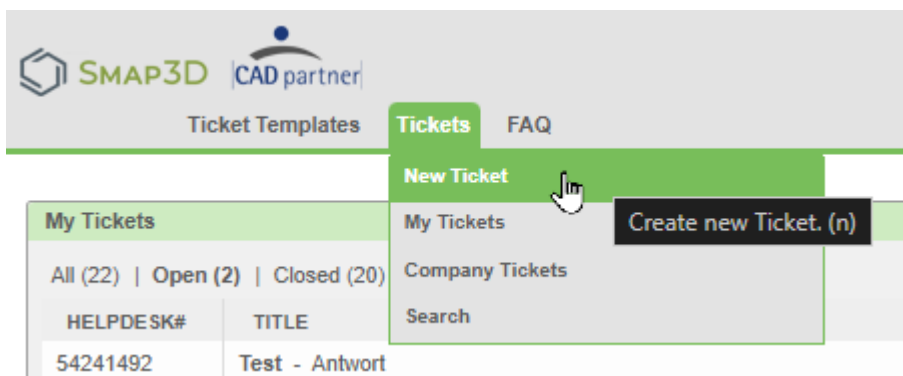

You can make various configurations via the Settings menu in the upper right margin.

In addition to setting the **language** displayed in the **user interface**, you can also **change your password** here.

2. Initiate a new request (ticket)

The “New ticket” listing in the Tickets menu accesses the input screen for initiating a new request.

Data about the product in question and the system environment must first be entered in the input screen (required fields are marked with an *):

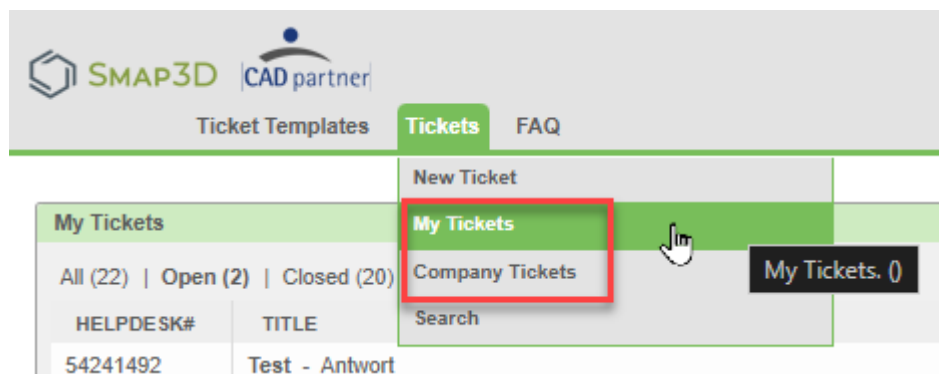

Image files can be copied from the clipboard directly into the text field. Larger files such as assemblies or drawings can be added as an attachment. The maximum file size for **attachments** is 100 MB.

In the **Customer ticket number** field, you can select an internal reference such as the name of the respective end user involved in the process. This internal reference is then displayed in the ticket overviews.

Once you have entered all your information, the process is completed by pressing the **Submit** button.

3. Ticket overviews

Overview lists with all requests can be accessed via the Tickets menu. This gives you an overview of your ongoing and completed support requests at all times.

The **My tickets** overview lists only tickets that were added by the currently registered user. The **Company tickets** overview lists all requests by your company and the associated end user.

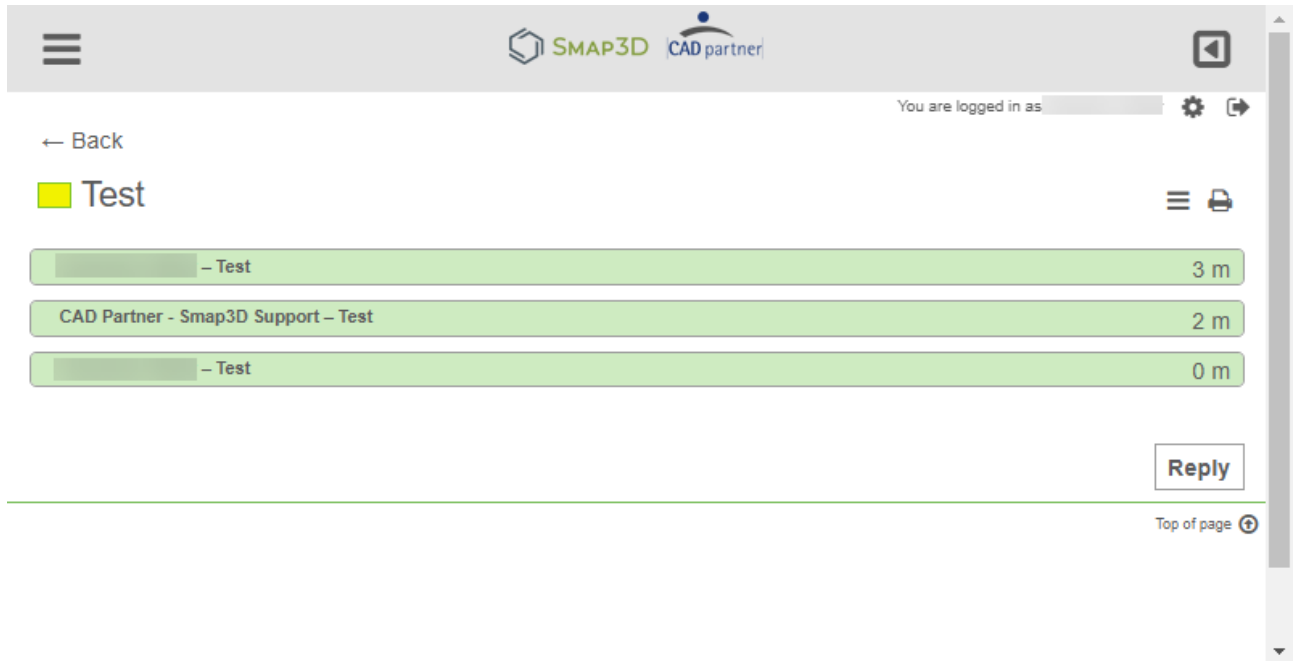

In the selected ticket overview, you can choose whether to display **all** requests, **open** requests only, or **closed** requests.

4. Detail view for requests

The Detail view is accessed by selecting a process in the ticket overview.

There, every communication with regard to the process is saved as a line item and can be opened in a detail view by clicking.

The screenshot shows a web interface for ticket management. At the top, there is a navigation bar with a hamburger menu icon on the left, the SMAP3D and CAD partner logos in the center, and a user profile icon on the right. Below the navigation bar, there is a header area with a 'Back' button, a 'Test' label with a yellow square icon, and a 'You are logged in as' dropdown menu. The main content area displays a list of three tickets, each with a green bar and a timestamp: 'Test' (3 m), 'CAD Partner - Smap3D Support - Test' (2 m), and 'Test' (0 m). A 'Reply' button is located at the bottom right of the ticket list. A 'Top of page' link is also visible at the bottom right of the interface.

If we have replied to a request or if you want to submit additional information on a request, please use the **Reply** function in the detail view of the ticket.

For further questions about using the system, please contact hotline@cadpartner.de or support@smap3d.com.
