## PDM Studio installation packages

# For the fast, efficient start

PDM Studio is the perfect solution for the management of product data in mechanical and plant engineering. The operating concept and administration are very intuitive. The software can be used flexibly and implementation is quick and easy. PDM Studio is also characterized by its extensive and constantly growing range of functions and its individual expansion options.

Based on our many years of experience in numerous projects, with PDM Studio BASIC we have put together an optimal starter package for you. The PDM Studio PLUS package supplements this starter package and

contains additional configurations that most frequently ordered by our customers. Of course, both packages can also be individually extended.

Thanks to standardization, we are able to offer both packages with an attractive price/performance ratio. This makes the introduction of PDM Studio quick and efficient. Both your employees involved in the project and the subsequent users will be minimally affected by the introduction in their day-to-day work. This leads to a high level of acceptance among all employees and thus secures your investment.

### **PDM Studio BASIC**

PDM Studio BASIC is the ideal starter package. It includes the installation and standardized pre-configuration of PDM Studio with the most common templates, properties, workflows and a rights and roles concept. It also includes the configuration of the PDM Studio Automation Client for the automatic generation and export of PDF, DXF and STEP files as well as key user training. And you're ready to get started with PDM Studio!

### **PDM Studio PLUS**

PDM Studio PLUS is a supplementary configuration package to extend PDM Studio BASIC. It contains the customizations most frequently requested in previous projects in an attractive package. Among others, it includes a workshop for defining and implementing an existing drawing template as well as the configuration of user-defined properties. Also, the test status as well as the proto type approval is added to the life cycle.

### **PDM Studio INDIVIDUAL**

PDM Studio can be individually configured on request. You decide how you want to get started with PDM Studio. Whether a customized life cycle according to your needs, configuration of additional properties, adaptation of the rights and roles concept or the setup of additional automated workflows; PDM Studio can be flexibly adapted.

### **PDM Studio INDIVIDUAL**

### **PDM Studio PLUS**

### **PDM Studio BASIC**

## **YOUR BENEFITS**

- Quick and easy start with PDM
- Individually adaptable to your needs
- Reduction of effort and risk
- Clearly structured and resource-saving project scope
- Based on years of experience
- Attractive price/performance ratio

- Requirement (part of another package)
- Included in the package

### Basic installation & configuration

Installation (server, client & Automation Client)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Basic configuration PDM Studio	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Predefined status and revision management	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Predefined life cycle	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Customized life cycle: prototype release		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Customized life cycle: Test status		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Customized life cycle according to customer requirements			<input checked="" type="checkbox"/>
Accompanied test phase: Fit-gap analysis			<input checked="" type="checkbox"/>

### Properties & standard parts

Preconfigured properties	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Configuration of 5 user-defined properties		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Configuration of further properties			<input checked="" type="checkbox"/>
Configuration of PDM Studio as a provider for standard parts		<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Drawing template

Standard drawing template	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Customization of the font header incl. workshop		<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Automation Client

Installation & standard configuration	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Creation of the neutral formats PDF, DXF and STEP	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Configuration for local use		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Creation of further neutral formats			<input checked="" type="checkbox"/>

### Training

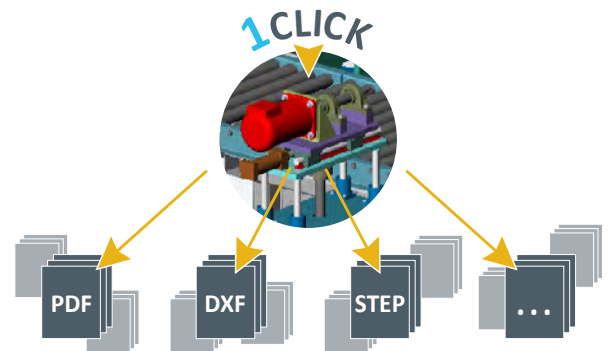

Key User	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Administrator			<input checked="" type="checkbox"/>
User			<input checked="" type="checkbox"/>
Automation Client			<input checked="" type="checkbox"/>

## PDM Studio Highlight

### Automation of routine tasks

The extension modules of PDM Studio considerably expand the application possibilities. One special module is the Automation Designer. It can be used to automate recurring processes. This relieves employees of time-consuming routine tasks and minimizes the risk of manual errors.

The Automation Designer offers a wide range of functions such as the automatic completion of properties, the provision of neutral formats, user-friendly copy assistants, the control of print and plot jobs or time-controlled data provision. It also contains action blocks for processing sheet metal parts and production lists. The special feature: All functions are individually customizable and can be put together graphically by the user without any programming knowledge.

### YOUR BENEFITS

- Many action blocks already included, e.g. for creating neutral formats or parts lists
- Consistent, up-to-date product data for all departments
- Significant time and cost savings
- Avoidance of manual errors
- Event-controlled workflows for maximum automation
- Configurable: no programming knowledge required
